Contents

Letters to the Editor

Modelling time variable and total eclipses of the millisecond pulsar PSR 1744-24A
Tavani, M., Brookshaw, L. L1

Search for TeV gamma rays from Geminga
Vishwanath, P.R., Sathyanarayana, G.P., Ramanamurthy, P.V., Bhat, P.N. L5

The central stars of He 2-131 and He 2-138: photometric variations
Hutton, R.G., Méndez, R.H. L8

IRAS 06562-0337: final mass-loss episodes before the formation of a planetary nebula?
Garcia-Lario, P., Manchado, A., Sahu, K.C., Pottasch, S.R. L11

A new test for cosmic structure based on the anisotropy field of 60-μm extragalactic IRAS sources
Fabbri, R., Natale, V. L15

SAO 244567: a post-AGB star which has turned into a planetary nebula within the last 40 years
Parthasarathy, M., Garcia-Lario, P., Pottasch, S.R., Manchado, A., Clavel, J., de Martino, D., Van de Steene, G.C.M., Sahu, K.C. L19

A rapid optical flare in the distant γ-ray source 0836-710
von Linde, J., Borgeest, U., Schramm, K.-J., Graser, U., Heidt, J., Hopp, U., Meisenheimer, K., Nieser, L., Steinle, H., Wagner, S. L23

Linear size evolution of extended quasars
Chyży, K.T., Zięba, S. L27

PG 0824+289: a dwarf carbon star with a visible white dwarf companion
Heber, U., Bade, N., Jordan, S., Voges, W. L31

A new pulsating PG 1159 white dwarf RXJ 2117.1+3412
Vauclair, G., Belmonte, J.A., Pfeiffer, B., Chevreton, M., Dolez, N., Motch, C., Werner, K., Pakull, M.W. L35

The saturation of fast dynamic magnetic reconnection
Craig, I.J.D., Henton, S.M., Rickard, G.J. L39

Period variations and phase residuals in freely precessing stars
Bisnovatyi-Kogan, G.S., Kahabka, P. L43

No molecular gas in M 87: just a monster?
Braine, J., Wiklind, T. L47

Lagrangian perturbation theory: a key-model for large-scale structure
Buchert, T. L51

A 59^m photometric period in the dwarf nova V 485 Centauri
Augusteijn, T., van Kerwijk, M.H., van Paradijs, J. L55

Cosmology

Can the neutrino picture be revived? QSO constraints revisited
Blanchard, A., Buchert, T., Klaffl, R. 1

The contribution of quasars to the cosmic X-ray background
Zhou, Y.Y., Hu, Y.D., Yu, K.N., Young, E.C.M. 11

The nature of the angular momentum of galaxies: the hydrodynamical theory
Chernin, A.D. 315

Formation of primordial molecules and thermal balance in the early Universe
Puy, D., Alecian, G., Le Bourlot, J., Léorat, J., Pineau des Forêts, G. 337

Extragalactic astronomy

Studies of narrow polar rings around E galaxies. I. Observations and model of AM 2020–504
Arnaboldi, M., Capaccioli, M., Cappellaro, E., Held, E.V., Sparke, L. 21

Polarization properties at 1.4 GHz of low luminosity radio galaxies
Parma, P., Morganti, R., Capetti, A., Fanti, R., de Ruiter, H.R. 31

Synchrotron radiation from the jet of 3C 273. II. The radio structure and polarization
Conway, R.G., Garrington, S.T., Perley, R.A., Biretta, J.A. 347

High-frequency variability of extragalactic radio sources. I. A dependence of the apparent variability on wavelength, time base of observations, and rate of time sampling
Machalski, J., Magdziarz, P. 363

High-frequency variability of extragalactic radio sources. I. A dependence of the apparent variability on wavelength, time base of observations, and rate of time sampling
Machalski, J., Magdziarz, P. 363

Galactic structure and dynamics

Candidate OH/IR stars in the outer parts of our Galaxy
Blommaert, J.A.D.L., van der Veen, W.E.C.J., Habing, H.J. 39

vby-β CCD field star photometry with the Nordic Optical Telescope
Jønch-Sørensen, H. 54

Galactic diffusion and wind models of cosmic-ray transport. I. Insight from CR composition studies and γ-ray observations
Bloemen, J.B.G.M., Dogiel, V.A., Dorman, V.L., Ptuskin, V.S. 372

The 1 : 1 resonance in galactic-type Hamiltonian systems
Caranicolas, N.D. 388

Stellar clusters and associations

Indications for common origin and gravitational interaction in three binary LMC clusters
Kontizas, E., Kontizas, M., Michalitsianos, A. 59

Blanketing effects in the very metal-rich bulge globular cluster Terzan 1
Ortolani, S., Bica, E., Barbuy, B. 66

Metallicities and radial velocities of old open clusters
Friel, E.D., Janes, K.A. 75

Formation, structure and evolution of stars

The radio counterpart of the Z source GX 340+0
Penninx, W., Zwarthoed, G.A.A., van Paradijs, J., van der Klis, M., Lewin, W.H.G., Dotani, T. 92

Viscous-thermal evolution of free accretion disks around new born neutron stars
Mineshige, S., Nomoto, K., Shigeyama, T. 95

(RN) Radio observations of the low-mass X-ray binary 2S 0921–630
Zwarthoed, G.A.A., Stewart, R., Penninx, W., van Paradijs, J., van der Klis, M., Roy, A.L., Amy, S.W. 101

(RN) A spectroscopic ephemeris of the secondary star in the AM Herculis binary V 834 Centauri
Schwope, A.D., Thomas, H.-C., Beuermann, K., Reinsch, K. 103

A period study of SS Arietis and its implications for the multiplicity of the system
Demircan, O., Selam, S.O. 107

Near-infrared photometry and spectrophotometry of two unusual novae
Kidger, M.R., Martínez-Roger, C. 111

An empirical torque noise and spin-up model for accretion-powered X-ray pulsars
Baykal, A., Ögelman, H. 119

The effects of heating and accretion on the evolution of binary systems
Huang, R.Q., Yu, K.N. 392

On the formation rate and space density of close white dwarf main sequence star binaries
de Kool, M., Ritter, H. 397

Synthetic AGB evolution. I. A new model
Groenewegen, M.A.T., de Jong, T. 410

Formation of double neutron star systems and asymmetric supernova explosions
Yamaoka, H., Shigeyama, T., Nomoto, K. 433

Star formation in Bok globules and low-mass clouds. V. H α emission stars near Sa 101, CG 13 and CG 22
Reipurth, B., Pettersson, B. 439

Stellar atmospheres

Radio spectra of selected Algol-type binaries
Umana, G., Trigilio, C., Hjellming, R.M., Catalano, S., Rodonó, M. 126

The β Pictoris protoplanetary system. XIV. Simultaneous observations of the Ca II H and K lines; evidence for diffuse and broad absorption features
Ferlet, R., Lagrange-Henri, A.-M., Beust, H., Vitry, R., Zimmerman, J.-P., Martin, M., Char, S., Belmahdi, M., Clavier, J.-P., Coupiac, P., Foing, B., Sevre, F., Vidal-Madjar, A. 137

The effects of stellar surface activity on the strength of the lithium 6708 Å line
Pallavicini, R., Cutispoto, G., Randich, S., Gratton, R. 145

Stability analysis of colliding winds in a double star system
Dgani, R., Walder, R., Nussbaumer, H. 155

The reddening and variability of XX Ophiuchi
Evans, A., Albinson, J.S., Barrett, P., Davies, J.K., Goldsmith, M.J., Hutchinson, M.G., Maddison, R.C. 161

Ultraviolet spectroscopic variability of the WN 5 star HD 50896: timescales and linear physical dimensions of the perturbations
St-Louis, N., Howarth, I.D., Willis, A.J., Stickland, D.J., Smith, L.J., Conti, P.S., Garmany, C.D. 447

Radial pulsation in variable stars with mass loss
Pijpers, F.P. 471

S-bearing molecules in O-rich circumstellar envelopes
Omont, A., Lucas, R., Morris, M., Guilloteau, S. 490

Characterization and proportion of very cold C-rich circumstellar envelopes
Omont, A., Loup, C., Forveille, T., te Lintel Hekkert, P., Habing, H., Sivagnanam, P. 515

Diffuse matter in space (including HII regions and planetary nebulae)

Bipolar structure of the Herbig-Haro object RNO 40
Bohigas, J., Persi, P., Tapia, M. 168

The spatio-kinematic structure of the CO envelopes of evolved planetary nebulae
Bachiller, R., Huggins, P.J., Cox, P., Forveille, T. 177

The β Pictoris circumstellar disk. XV. Highly ionized species near β Pictoris
Deleuil, M., Gry, C., Lagrange-Henri, A.-M., Vidal-Madjar, A., Beust, H., Ferlet, R., Moos, H.W., Livengood, T.A., Ziskin, D., Feldman, P.D., McGrath, M.A. 187

Episodic symmetric jets in the planetary nebula Fg 1
López, J.A., Roth, M., Tapia, M. 194

Spectroscopy and shock modelling of the unusual bipolar outflow NGC 6905
Cuesta, L., Phillips, J.P., Mampaso, A. 199

Refractive interstellar scintillations and low frequency variability: a detailed analysis using measured source structures
Spangler, S.R., Eastman, W.A., Gregorini, L., Mantovani, F., Padrielli, L. 213

Measurement of the methyl cyanide *E*/*A* ratio in TMC-1
Minh, Y.C., Irvine, W.M., Ohishi, M., Ishikawa, S., Saito, S., Kaifu, N. 229

Infrared and submillimetric emission lines from the envelopes of dark clouds
Le Bourlot, J., Pineau des Forêts, G., Roueff, E., Flower, D.R. 233

Microscale structure in the Norma dark cloud
Waldhausen, S., Marraco, H.G. 255

Detailed radio morphology of the compact nebula K 3-35
Aaquist, O.B. 260

The fragmentation of molecular clouds: critical (Jeans) mass in the vicinity of thermal instability and influence of visible extinction variations
Renard, M., Chièze, J.P. 549

A kinematical study of the jet GGD 34
Gómez de Castro, A., Miranda, L.F., Eiroa, C. 559

The Sun

Rotational effects on convection simulated at different latitudes
Pulkkinen, P., Tuominen, I., Brandenburg, A., Nordlund, Å., Stein, R.F. 265

On the correlation of power in sunspot umbral oscillations with continuum brightness
Aballe Villero, M.A., Marco, E., Vázquez, M., García de la Rosa, J.I. 275

Are sunspot penumbrae deep or shallow?
Solanki, S.K., Schmidt, H.U. 287

The importance of plasma viscosity on X-ray line diagnostics of solar flares
Peres, G., Reale, F. 566

Properties of the atmospheric noise in full-disk photometric observations of solar oscillations: implications for asteroseismology from the ground
Clette, F. 577

Dynamics of flaring loops. III. Interpretation of flare evolution in the emission measure-temperature diagram
Sylwester, B., Sylwester, J., Serio, S., Reale, F., Bentley, R.D., Fludra, A. 586

A two-fluid model for the solar wind
Massaglia, S. 595

The solar system

Seismological observations with a Fourier transform spectrometer: detection of Jovian oscillations
Mosser, B., Mékarnia, D., Maillard, J.P., Gay, J., Gautier, D., Delache, P. 604

Celestial mechanics and astrometry

Orbital elements of the eight major satellites of Saturn determined from a fit of their theories of motion to observations from 1886 to 1985
Dourneau, G. 292

The dynamics of Martian satellites from observations
Emelyanov, N.V., Vashkovyak, S.N., Nasonova, L.P. 634

Physical and chemical processes

Stark broadening of C IV lines
Schöning, T. 300

Efficiency of gravitational radiation from axisymmetric and 3 D stellar collapse. I. Polytropic case
Bonazzola, S., Marck, J.A. 623

Multiple-peaked line profiles from relativistic disks at high inclination angles
Matt, G., Perola, G.C., Stella, L. 643

The effect of convection on two temperature soft photon Comptonized accretion disks
Meirelles Filho, C. 651

Instruments, data processing, and computational methods

A new approach to the Malmquist bias
Luri, X., Mennessier, M.O., Torra, J., Figueras, F. 305

Papers accepted for publication in A. & A. 660
